

RESURRECTION LIVING

NUMBER 160

MAY 2021

“For we died and were buried with Christ by baptism. And just as Christ was raised from the dead by the glorious power of the Father, now we also may live new lives.” (Rom. 6:4)

Most of us are living between resurrections. First we were raised from spiritual death to spiritual life through our baptism. “For you were buried with Christ when you were baptized. And with him you were raised to new life because you trusted the mighty power of God, who raised Christ from the dead.” (Col. 2:12) Resurrection living is mindfully discerning the way Jesus Christ wants us to live. We are no longer blinded by the god of this age like unbelievers but seek always to live for Jesus.

For many, it is difficult to grasp that we are spiritually dead without our birth through belief and baptism in Jesus Christ. Every living soul is eternal and will live forever, yet some will be separated from God for eternity. Make every effort to welcome the grace provided by Jesus’ life and death to free us from such a horrible existence.

Prayers for Intervention Deserve Attention

In times of widespread severe distress, many people become disappointed that God seems unwilling to intervene directly and timely in response to prayers for relief. Because God is Holy, His love is everlasting, He is a God of compassion, and a God always ready **when we are**. God uses His people - believers and followers of His Son Jesus Christ, to serve His purposes. It is God’s people, who understand and are equipped to serve Him as “first responders”, who are called upon to be

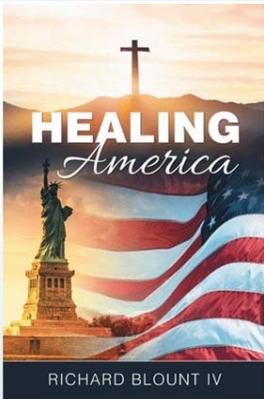

aware of needs of their neighbors - whom they are to “love as themselves”, to mobilize themselves and reach out to all who may be calling upon the Lord in their time of need and “follow through”.

When we seek shelter from sudden storms of life, we are very likely to be unprepared to act alone to save ourselves and we need help from one-another. We especially need help from those among us who are knowledgeable, skilled, equipped, willing and dedicated to serve those unable to “go it alone”.

HEALING AMERICA

A timely new book by Richard Blount IV exploring the problems, causes, solutions, and benefits of being an American.

He provides an intentional approach for the country’s healing process and aims at healthy relationships and spiritual maturity as the ultimate goal.

This book can be purchased for \$19.95 at: Amazon, Barnes & Nobles, and Westbow Publishing

AN INVENTOR LOOKS AT GOD

Thomas Edison was a prolific inventor, with 1093 US patents to his name. He is probably best known for inventing the light bulb, which he did not actually invent. He made inventions to improve the light bulb rather than to originally invent it. The original light bulb invention was made by Humphry Davy in 1802. Edison primarily made light bulbs able to burn for long enough to be practical. He made a step in technology on light bulbs.

With more than ten million US patents issued, what any one inventor does is a drop in the bucket both in terms of number of patents and improving technology. Occasionally an Edison or Tesla comes along and makes significant contributions, but they are still a minor overall contribution to US Patent technology which is about 230 years old.

Edison, Tesla, and anyone else stands on the shoulders of hundreds of other inventors and scientists who have gone before and developed the technology which they used to make their additional contributions. It is inconceivable that Edison could have started with a lump of clay and made a light bulb. Electricity, glass, fibers, metal, machines, torches and a lot of other technology were readily and available as materials for Edison to combine to make his light bulb improvements.

To emphasize that point, the smartest person in the world does not start with nothing and make an advanced invention. The smartest person in the world utilizes a massive amount of prior technology to make his advances. The smartest person in the world takes the

next step forward or maybe makes two steps forward in a particular technology.

Combine that realization with the fact that all the technology we have pales in comparison to the technology in a single living cell. We not only do not know how to replicate all that we know of in a cell, we don't even know what all is in a cell. DNA programming a cell is more complex than the most complex computer programs which hundreds of human programmers have devised. We can't make programs like this, we can't even decode that one which exist in our cells.

Now, imagine a single person with enough intelligence and power take a lump of clay and turn it into a living breathing person with all the complexity in a living breathing person. Add to that the intelligence and power to make the lump of clay also with all that entails in the first place. Add to that the great variety of living forms, such as even more than 100,000 varieties of insects. Add to that creating the great mass and order in the Universe. All this power and order exists, so there is some intelligence which invented, designed, and created it.

This is not someone who is a little smarter than us or twice as smart as we are. This is someone orders of magnitude smarter and more powerful than we are. It is an intelligence so great we do not have the ability to understand it. We can only appreciate it.

It is not hard to believe in God. Look all around and you will see a great variety of evidence of God. It is simply naïve to think that all the complexity around us happened by accident. We should all believe in God, and act like we do.

Continued on page 3

Prayers for Intervention Deserve Attention, p. 2

Resurrection Living, p. 2

Solomon reminds us in Ecclesiastes 4:9,10,12

“Two are better than one because they have a good return for their work: If one falls down His friend can help him out. But pity the man who falls and has no one to help him up! Though one may be overpowered, two can defend themselves. A cord of three strands is not quickly broken.”

All people commonly perceive the reality that bodily recovery from injuries which require a period of rest to permit healing may also require a period of isolation to reduce risk of exposure to unrelated pathogens. When our community body is compromised by unanticipated virulent contagion, it is becoming upon the entire body to comply with authorities requesting voluntary isolation in order to stifle the risk of compound consequences of exposure, re-exposure and spread of infection to the more susceptible members of the community.

It is also timely to reflect on the wisdom of several proverbs of Solomon:

Proverbs 21:16 “ A man who strays from the path of understanding comes to rest in the company of the dead.”

Proverbs 12:15 “The way of a fool seems right to him, but a wise man listens to advice.”

Proverbs 9:8 “Do not rebuke a mocker or he will hate you; rebuke a wise man and he will love You.”

Proverbs 12:16 “A fool shows his annoyance at once, but a prudent man overlooks an insult.”

Proverbs 13:13 He who scorns instruction will pay for it, but he who respects a command is Rewarded.”

Proverbs 24:17-18 Do not gloat when your enemy falls; when he stumbles, do not let your heart Rejoice, Or the Lord will see and disapprove and turn his wrath away from him.”

Larry S. Grubbs, Harrison, Ohio

Resurrection living means we have a new mindset. “Since you have been raised to new life with Christ, set your sights on the realities of heaven, where Christ sits in the place of honor at God’s right hand.” (Col. 3:1) We focus on the joys of heaven because our real life is there, not on things of this earth. We put aside everything that hinders and entangles us in worldly things. “For he raised us from the dead along with Christ and seated us with him in heavenly realms because we are united with Christ Jesus.” (Eph. 2:6)

Are you between resurrections?

Will you practice resurrection living this week?

What will you share about resurrection living?

Elizabeth Brown, Texarkana, TX

An Inventor Looks at God, p. 2

We should not be letting atheist cause us to question our belief in God. We should be encouraging atheists to reasonably look at the great level of order and design which demands an intelligent designer, and help them believe in God. The whole Impossible for Evolution series of articles is an attempt at this.

In summary, lawyers probably consider God to be the great law giver, accountants probably see God as the bookkeeper, psychologists probably see God as the great counselor, artists probably see the great beauty of God’s nature, and carpenters probably see God as the great craftsman. In the same way, any of us inventors, designers and other innovators probably have a greater than average appreciation for the special talents of God in the spectacular creation and design of the universe and everything in it.

AS YOUR CONGREGATION
COMES OUT OF THE
COVID CRISIS:

WILL YOU RETURN TO
BUSINESS AS USUAL

OR

WILL YOU TAKE
ADVANTAGE OF THIS
OPPORTUNITY TO
REFOCUS YOUR
CONGREGATION?

WINGS OF EAGLES VIDEO SERIES

Three new 20-minute videos which can be
used to assist in personal evangelism.

Available as a free download.

LESSON TOPICS ARE:

- (1) **IF GOD?** Atheistic evolution vs the reality of a god.
- (2) **WHICH GOD?** The various offerings to be the god.
- (3) **WHICH GROUP?** A brief history of the world and of Christianity leading to a discussion of how to find Christ's church.

Located at occg.institute, TOPICAL LESSONS , 02 WINGS OF EAGLES

GUARANTEED CHURCH GROWTH!

If we provide a **REFOCUS WEEKEND**, we will guarantee that if your congregation does not grow 5% in 2 years we will donate \$5,000 to the Church of Christ related children's home of your choice in your name.

A REFOCUS WEEKEND IS:

- (1) Friday night: Area-wide youth rally at your facility; we provide the pizza & cokes
- (1) Saturday 8:00 - 2:00: Church growth consultation
- (2) Saturday or Sunday afternoon: Dream Session
- (3) Sunday Bible Class: A church growth lesson
- (4) Sunday morning worship: A church growth sermon

See <https://occg.institute/services/refocus/> for more specific information.

IMPOSSIBLE FOR EVOLUTION #116 - MOSQUITOS

On deciding to write about the unique development of mosquitos having a hypodermic needle as a nose to stab into your skin to suck blood, it seemed like an adequate topic to label as "impossible for evolution". Surely the invention and DNA programming to make such a hypodermic needle would qualify as impossible for evolution. Turns out reality makes the seemingly impossibility of a small bug developing a hypodermic needle seem simple in comparison.

When a mosquito lands on a victim, it has a sheath called a labium which it touches the skin. The female mosquito does not insert its labium into the skin; it bends back into a bow when the mosquito begins to bite. The tip of the labium remains in contact with the skin of the victim, acting as a guide for the other mouthparts. In total, there are six mouthparts besides the labium: two mandibles, two maxillae, the hypopharynx, and the labrum.

The mandibles and the maxillae are used for piercing the skin. The mandibles are pointed, while the maxillae end in flat, toothed "blades". To force these into the skin, the mosquito moves its head backwards and forwards. On one movement, the maxillae are moved as far forward as possible. On the opposite movement, the mandibles are pushed deeper into the skin by levering against the maxillae. The maxillae do not slip back because the toothed

blades grip the skin.

The hypopharynx and the labrum are both hollow and are then inserted into the skin. Saliva with anticoagulant is pumped down the hypopharynx to prevent clotting, and blood is drawn

Ecowatch.com

up the labrum.

Prior to and during blood feeding, blood-sucking mosquitoes inject saliva into the bodies of their source(s) of blood. This saliva serves as an anticoagulant; without it the female mosquito's proboscis might become clogged with blood clots.

The invention of the secondary saliva system to prevent blood clotting along is worth being called an impossible task for evolution. This is just one of the tens of thousands of details that God takes care of so we can take them for granted.

Benton F. Baugh

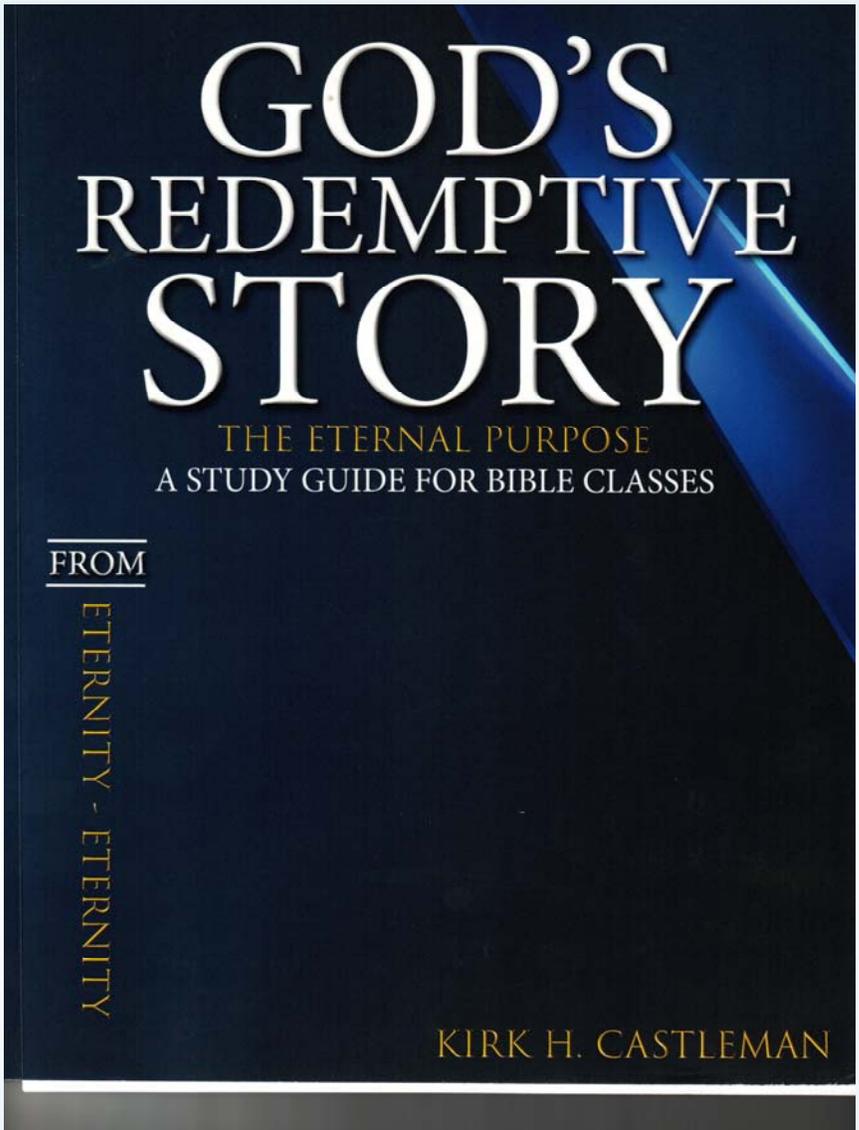

Details taken from Wikipedia

A 13 lesson book written by a long time Church of Christ minister and servant of Jesus. Intended for Bible Class studies, this book can also be used for personal evangelism.

The 13 lessons, which can be extended to even 26, "unfold God's eternal purpose to redeem all men from eternity unto eternity"

Most Bible class study books on this subject begin with Genesis 3. This study however, lays the foundation by beginning with a basic study-outline of Biblical History, which is sorely lacking among many Christians today. Then after laying this foundation, it seeks to present a "Synthesis of Scripture" by asserting that the theme of all the Bible is Jesus, His Death, Burial, and Resurrection! The Eternal Purpose of God for Redemption is then presented with an in-depth study of Ephesians 1, and other New Testament passages which describe God's redemptive plan.

It is not until the fourth lesson that God's Eternal Purpose in Genesis 3 is presented. Then other Promises, Pictures, Prophecy, and Preparation, are fully described. This study includes a description of the Davidic Covenant, as well as a helpful approach to Old Testament Prophecy.

ly every book in the Bible, but have never seen the overarching view until I did this study! I recommend it highly to understand the purpose of the Bible!" (Oklahoma)

**"AN EXCITING STUDY OF GOD'S
POWER AND REVELATION IN
HUMAN HISTORY"**

This guide is helpful for all Christians, but especially new Christians who need an understanding of God's eternal desire for all the world!

The concluding lessons focus on the Provision and Proclamation of God's Eternal Purpose. From Eternity to Eternity! One well-known elder/teacher said, "I have taught near-

This book can be bought on Amazon for \$10.

SUMMARY: For sixteen centuries churches have exercised more and more control over life and science to the point of persecuting anyone who disagreed with the official policies of the church, including on science. Because of overstating the case or overreaching, religion has had to retreat on numerous unfounded positions in the past 4 centuries. Whereas there have been some teachings we need to retreat from, the truth is on our side and it is time to stop retreating and do our part of the Great Commission. They have been church error, not Bible error.

Following is a general listing of events which impact this subject. Most are complex situations, so for brevity, they are simply stated.

FIRST CENTURY (33)

Christianity was started as a non-socially approved religious group which was largely either persecuted or ignored by the State. They produced a New Testament which is scientifically correct to compliment the Old Testament which is also scientifically correct.

CONSOLIDATION OF CHURCH AND STATE (378)

By 378 AD Christianity had become so popular that it became the religion of the Roman leaders (Constantine) and became a preferred religion rather than a persecuted one.

DOMINANCE OF CHURCH OVER STATE

In the Middle Ages and to the reformation, the Catholic Church tried to gain superiority to secular authority. The Catholic Church presumed the power to excommunicate kings and have nations under the interdict of the Pope in defiance of Christ and His apostles, "Let every soul be subject unto the higher powers. For there is no power but of God: the powers that be ordained of God" (Rom 13:1).

INQUISITION: (1229-1870)

By 1229 the State Church had become so powerful that it was able to kill anyone who objected to their beliefs by burning them alive. What many of them were burned alive for was for believing things similar to what Churches of Christ teach today. (200,000 burned between 1401 and 1612)

BANNING THE BIBLE (1229)

The Roman Catholic Church banned the Bible to the laity at the Council of Toulouse.

PRINTING PRESS (1440)

The invention of the print press greatly improved the availability of Bibles to ordinary people. This was a key ingredient of the Reformation.

RELIGION'S OVER REACHING IN SCIENCE:

As an indication of how much power and control over life and science religion had taken, in 1633 Galileo Galilei was condemned by the Catholic Church for "vehement suspicion of heresy" for suggesting that the Earth revolved around the Sun and was put under house arrest for the rest of his life.

Topics were scientific truths at one time and thought to be reinforced by an interpretation of the Bible which seemed reasonable at the time. The interpretations became church doctrine and accepted as fact. When additional actual scientific observations were made, there was a resistance to reasonable change, leaving religion open to criticism.

GEOCENTRIC UNIVERSE: The Earth was thought to be the center of the universe with the Sun and other planets rotating around the Earth. (See Galileo)

24 HOUR CREATION DAYS: Early observations would have seemed compatible with this, but when additional observations were made the interpretations were not appropriately adjusted to clear scientific facts.

ZENITH OF CHURCH POWER AND INFLUENCE

By the 1500s, the single church in Europe was at its zenith of power and influence having kings in subjection, the ability to determine what was science, the ability to burn people alive for disagreeing with them, and the ability to prevent others from having access to the Bible. Additionally:

ANSWERING PRAYERS: They and a lot of people still promise God will answer prayers to an extent which clearly does not happen.

FORGIVE SINS: They took upon themselves the power to replace God in the power to forgive sins.

INDULGENCES: They took the forgiveness of sins to the next step in the sale of indulgences which let you pay in advance to do a sin..

BEGINNING THE RETREAT

In the previous paragraph a zenith of church power and influence was discussed in which the church exerted massive influence over all form of life in western Europe, to the point of persecuting anyone who disagreed religiously or scientifically. This section will overview major events following and indicate with a down ↓ arrow if it represents a retreat for religion, an up arrow ↑ if it is an advance for or tends to favor religion, and a horizontal arrow → if the event does not significantly impact religion. This does not mean any particular item is right or wrong, just how it impacts religion in general.

REFORMATION (1517-1648)

Beginning in 1517 with Martin Luther, various groups objected to the Roman Catholic church control and policies and form their own groups. It largely did not do away with State churches, it primarily did away with Roman Catholics being the state church in some places.

RENAISSANCE (14th – 17th CENTURIES)

A rebirth of science and the arts after the Middle Ages.

SCIENTIFIC REVOLUTION (1500-1750)

The Scientific Revolution was a series of events that marked the emergence of modern science during the early modern period, when developments in mathematics, physics, astronomy, biology (including human anatomy) and chemistry transformed the views of society about nature.

THE ENLIGHTENMENT (FROM 1637, 1687 OR 1715 TO 1789 OR 1800)

The Age of Enlightenment (also known as the Age of Reason or simply the Enlightenment) was an intellectual and philosophical movement that dominated the world of ideas in Europe during the 17th and 18th centuries. The Enlightenment included a range of ideas centered on the pursuit of happiness, sovereignty of reason and the evidence of the senses as the primary sources of knowledge and advanced ideals such as liberty, progress, toleration, fraternity, constitutional government and separation of church and state. Clearly scientists who had been constrained and persecuted by the church hierarchy were disposed to dispense with religion's influence over scientific matters.

INDUSTRIAL REVOLUTION (1760-1840)

The **Industrial Revolution** was the transition to new manufacturing processes in Europe and the United States, in the period from about 1760 to sometime between 1820 and 1840. This transition included going from hand production methods to machines, new chemical manufacturing and iron production processes, the increasing use of steam power and water power, the development of machine tools and the rise of the mechanized factory system. The Industrial Revolution also led to an unprecedented rise in the rate of population growth. The productivity as a result of this allowed a much greater number of individuals to have free time to investigate science and other options rather than spending 24-7 simply trying to survive and feed their families.

SCIENTIFIC MATERIALISM (LONG EXISTED, POPULARIZED IN THE 1900s)

Matter, energy, and physical laws are self-existent. Spontaneous creation. A form of philosophical monism that holds that matter is the fundamental substance in nature, and that all things, including mental states and consciousness, are results of material interactions.

ON THE ORIGIN OF SPECIES (1859)

The publishing of Charles Darwin's book has had a major impact on the relationship of science and religion. Survival of the fittest concept provided a means for creation of new species.

MISSING LINKS

The theory of evolution lacked a complete explanation of how all species were created and there some gaps in the proposed evolutionary process. The living organisms which would have been in the gaps were missing links. Supposed missing links have been repeatedly reported as found on the front pages of newspapers, and have been debunked with little media attention. In the examples below, the dates are announcement and when exposed as a fraud.

HAECKEL'S EMBROS (1793-1915): Taught that the development of an embryo goes thru evolutionary history.

JAVA MAN (1891-mid 1900s): Skull cap, leg bone, and two teeth found 45' apart and taught to be from one person.

PILTDOWN MAN (1912-1953): Human skull and Orangutan jaw filed and stained to match.

NEBRASKA MAN (1922-1927): A whole village of people based on a single damaged pig's tooth.

As these examples have been loudly announced, quietly dropped, and some are still being used to prove evolution, these have a negative impact on religion. Oddly enough when a fraud such as these is discovered, contemporary scientists are not so much embarrassed by having been duped as they are proud to show that science is self-correcting.

HEREDITY OF CHARACTERISTICS (1866)

Gregor Mendel (1822-1884) did experiments with peas to determine the effect of dominant and recessive genes, generally coming to the understanding that offspring do not have evenly balanced characteristics from each parent, but rather have different combinations of characteristics.

GOD OF THE GAPS

Through the years, if a process or activity was not understood, it was taught to be an active concurrent participation of God. Over time, science was able to explain more and more phenomenon, tending to disprove God's activities. This was taught by atheists that our God was simply God of the Gaps which hadn't been explained yet. They projected the confidence that someday science would explain the gaps also, eliminating the need for God.

WARFARE MODEL OF SCIENCE VS RELIGION (1874)

Largely started by John William Draper and Andrew Dickson White, nineteenth century revisionist historians. The warfare model is commonly believed. It is actually scientists vs religionists, not science vs God.

VESTIGIAL ORGANS

The identification of vestigial organs or organs formerly used but no longer used has been used to prove evolution. Examples are:

APPENDIX: Long identified as an example of a vestigial organ has now been learned to be God's plan for storing a flora of replenishment bacteria when events such as diahera occur.

HUMAN TAILBONE: Claimed to be vestigial as we do not have a tail, but it is the anchor point for our muscular system.

Ear muscles, body hair, and semilunar fold in the corner of the eye are other examples given. These are (1) an example of a vestigial organ, (2) an example of some the extremely complex DNA programming being used by a common designer, or (3) another example of something with a use which simply hasn't yet been determined.

MODERN SYSTHESIS (1942)

The modern synthesis was the early 20th-century synthesis reconciling Charles Darwin's theory of evolution and Gregor Mendel's ideas on heredity in a joint mathematical framework. Julian Huxley coined the term in his 1942 book, Evolution: The Modern Synthesis. It represents the common belief of a majority of scientists today.

COMPLEXITY OF LIFE

When Charles Darwin wrote On the creation of species (1859), it may have been reasonable to look at the outside of plants and animals and see commonality which could be interpreted as accidental evolution. Since then, almost everything science has learned has indicated how incredibly complex the Universe and life within the Universe is. There are many things in life which are simply impossible for accidental evolution to accomplish.

DEOXYRIBONUCLEIC ACID (DNA) 1950s

DNA is a molecule composed of two polynucleotide chains that coil around each other to form a double helix carrying genetic instructions for the development, functioning, growth and reproduction of all known organisms and many viruses. DNA was first identified as a compound in 1869 and was well identified in the 1950s. Its complex design and programming give a clear proof of an intelligent designer.

THE NEW ATHEISTS (2004-PRESENT)

“The laws of quantum physics explain how the universe came into existence from literally nothing, Consequently, he argues, It is completely unnecessary, even irrational, to invoke a creator to explain the origin of the universe.” (P 5, Return of the God Hypothesis) In other words they believe something can come from nothing so they have done away with a need for God.

All this being said, the truth is that God created the Heavens and the Earth and all that is in them. We collectively have been in retreat from an onslaught of atheistic viewpoints, and we should not be in retreat. The truth is that God exists. We need to realistically understand God’s plan and go out and be advocates for it.
